Director's Forward

Dear Valued Customers,

What a whirlwind of an adventure this season has been! As things have gone topsy-turvy, we have managed to keep our heads above the water and continue to offer you great quality at great value.

As this is the first edition, allow me to shed a little light onto the grand scheme of things. The idea of the Essentials Magazine will be to showcase our most popular products of any range, giving you full specifications and guides to pricing structures. Each magazine will feature information tailored to a specific range of products.

Going green is something we as a company hold in the highest regard, and as such it seemed only appropriate that our first edition be a spotlight on our Eco-Friendly LED range.

It is my hope that these publications will prove to be useful to you & as always, we are grateful for the support and look forward to continuing to be your first choice for lighting solutions.

Ricky

Light affects how we feel, influences the way we respond to the world around us and has a major impact on our decision-making process.

At LMR , we have the breadth of products, the solution controls and the end-to-end services to help you take advantage of today's advanced LED lighting solutions.

This First Edition Magazine, aims to help you make informed decisions about the right lighting that will make you feel good.

| BRIGHTNESS IN LUMENS | | 220+ | 400+ | 700+ | 900+ | 1300+ |

A man with a beard, wearing a dark blue zip-up jacket and a matching baseball cap, is seated and looking down at a smartphone held in his hands. The scene is dimly lit, with a warm, reddish-orange glow emanating from a light strip in the background, possibly under a piece of furniture. The man's face is partially illuminated by the ambient light. The overall mood is quiet and focused.

Strips

LMR

Premium Product

An LED strip light is a flexible circuit board that is populated with LEDs that you can stick almost anywhere you want to add powerful lighting in a variety of colors and brightnesses.

CUT TO LENGTH

You can cut the strip every few inches, allowing you to freely design your project without worrying about space requirements

FLEXIBLE

LED strip lights are flexible and can be bent vertically up to 90 degrees. This allows you to add light to places previously thought impossible.

COLOR OPTIONS

LEDs can be manufactured to emit a variety of single colors and color changing options.

LOW PROFILE

With a thickness of 1/16" (2mm), LED strips can be installed in many tight spaces and can easily be hidden from view.

PEEL & STICK

The back of the strip is fitted with a strong 3M tape, allowing you to peel and stick lights to many different surfaces.

FULLY DIMMABLE

Our LEDs are dimmable and compatible with most home automation and DMX systems, wall dimmers, and remote dimmers. You have complete control over your LEDs.

ADDED PROTECTION

Additional environmental protection can be added to make the strips IP65 or IP68 rated (Dust/water resistant or dust/waterproof)

CUSTOMIZABLE

We are able to customize specialty strips for your project to include custom colors, lengths, CRI, width, voltage, brightness and more.

— CREATE —

how does it work?

The basics are all the similar. You will need a strip light, a power unit, and a way to attach the two to make your lights turn on. The size and type of power unit will depend on the type of LED strip light, length required, and dimming option required. We are always here to assist in your selection. You can also purchase a complete kit here

POWER SUPPLY

**CONNECTORS
(optional)**

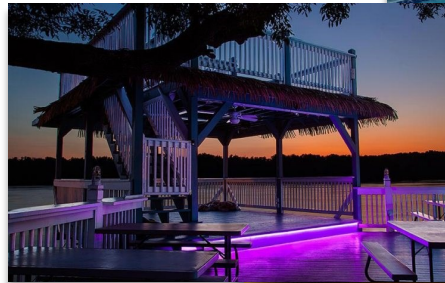

**DIMMERS & ACCESSORIES
(optional)**

4-5 Lumens Per LED

30 LED— 2.4W/ MTR

60 LED— 4.8W/ MTR

120 LED— 9.6W/ MTR

Enhance The great outdoors

Bring the "Wow-Factor" to your landscaping by enhancing it with accent lighting. Our strips are water proof so they wont be affected by the rain and are perfectly capable of being submerged into a pond or a pool to give a fairytale effect.
