Lamp Recycling... It's Never Been More Important, It's Never Been Easier.

When it comes to creating a sustainable future, we're all in this together. No Company can go at it alone and that is why LMR has pledged to provide eco-friendly lighting which has been endorsed by leading providers of environmental services.

Sustainability Is Everyone's Business

When we can do more with less, everyone wins. Businesses need to find ways to grow without adding to our environmental footprint — and the good news is, we're making steady progress.

Advanced technologies are helping us to be more efficient. We're using less energy and fewer resources, and generating less waste.

At a personal, corporate or national level, lighting plays an important role in any sustainability strategy. Whether you're interested in lowering your energy consumption, avoiding unnecessary maintenance, identifying options for lamp and ballast recycling, or finding products with fewer hazardous materials, LMR can help
